BYD PV modules awarded JET certification

Manufacturing giant BYD has been awarded the prestigious JET certification for their PV modules. The panels were put through many hours of rigorous testing, and now carry yet another industry stamp of approval.

The Japan Electrical Safety & Environment Technology Laboratories (JET) are one of Japan's leading standards groups responsible for evaluating quality and reliability of solar products. Japan's PV market has been in growth mode since the announcement of their Solar Feed-in-Tariff (FIT) program was initiated. Analysts are predicting Japan to become a leading consumer of solar products in the immediate future.

Over the past few years, BYD has developed a reputation as a Global New-Energy powerhouse. From the design and manufacture of some of the world's first hybrid and pure electric vehicles, to economical solar products and efficient energy storage solutions, the company has made it clear that they want to be the leading solution to the worlds growing environmental problems. Their presence at global solar expositions such as SPI

and Intersolar is just another sign BYD is here to stay, and the JET certification is well deserved.

About BYD

BYD Company Ltd. is one of China's largest companies to have successfully expanded globally. Specializing in battery technologies, their green mission to "solve the whole problem" has made them industry pioneers and leaders in several High-tech sectors including High-efficiency Automobiles, Electrified Public Transportation, Environmentally-Friendly Energy Storage, Affordable Solar Power and Information Technology and Original Design Manufacturing (ODM) services.

As the world's largest manufacturer of rechargeable batteries, their mission to create safer and more environmentally friendly battery technologies has led to the development of the BYD Iron Phosphate (or "Fe") Battery. This fire-safe, completely recyclable and incredibly long-cycle technology has become the core of their clean energy platform that has expanded into automobiles, buses, trucks, utility vehicles and energy storage facilities. BYD and all of their shareholders, including the great American Investor Warren Buffett, see these environmentally and economically forward products as the way of the future.

BYD has made a strong entrance to the North, Central and South American markets with their battery electric buses, and lineup of automobiles. Their mission lies not just in sales growth, but also in sociological integration and local job creation as they have poured incredible investments into developing offices, dealerships and manufacturing facilities in the local communities they now call home, truly a first for Chinese companies.
