

## **Sungrow Is The Most Requested Chinese PV Inverter Brands, According To IHS**

Sungrow was identified as the most requested Chinese photovoltaic (PV) inverter brand in a recent IHS global survey of PV inverter buyers, including system integrator, distributors and installers.

IHS (NYSE: IHS) is the leading source of information, analytics and expertise in critical areas that shape today's business landscape, including the PV inverter market.

In the IHS survey, more than 300 solar installers, distributors and engineering, procurement and construction (EPC) companies were asked about their preferences and opinions on PV inverters, in order to help suppliers better understand the needs and requirements of their customers. The survey was created following consultation with PV inverter suppliers and covers a variety of topics including buying preferences, brands, inverter choice, product features, micro inverters & power optimizers, service & warranty, inverter pricing and Chinese inverters. The survey also covers multiple geographic regions with responses analyzed by country and customer type. It was found that Chinese inverters are gaining increased acceptance in places such as the United States, Germany and the United Kingdom – with Sungrow as the highest-scoring Chinese brand.

Sungrow has been responsible for technological innovation and industrialized development of inverters for nearly 20 years with over 30% market share in China and more than 7GW accumulated inverters deployed in the world. Since 2008, Sungrow's products have entered the European and American markets and been widely used in these markets.

### **About Sungrow Power Supply Co., Ltd.**

Sungrow Power Supply Co., Ltd. manufactures power supply equipment for solar PV and wind power projects, including PV inverters, wind power converters, and distributed power supply. Founded in 1997, Sungrow employs approx. 1,000 people globally. By Q4 2013, Sungrow has over 7,000MW of inverters installed worldwide.

## Sungrow - Second largest PV inverter Supplier Globally In 2013 Based on IHS Research

Recently, IHS research reports that Sungrow Power Supply Co., Ltd., with its 3.8GW yearly shipments, ranks top 2 of PV inverter manufacturer in terms of MW shipments in the world in 2013, along with SMA, and is the only Chinese PV inverter manufacturer in top 10.

| 2011            |         | 2012            |        | 2013         |        |

| Sungrow         | 5 (+12) | KACO new Energy | 5      |              |        |
| Santemo         | 6       | Advanced Energy | 6      |              |        |

As the largest PV inverter manufacturer from Asia, Sungrow devoted to the innovation of PV inverter and other renewable energy conversion products for 17 years, mastered multiple core technologies and became an expert and pioneer in PV inverter industry. In recent years, Sungrow accelerated the speed of technical innovation and upgrading and constantly brought out new products to the PV inverter market. Photon lab has approved the performance of Sungrow inverters with comments like "Chinese Sturdiness", various products of Sungrow have already taken the leading position in China and entered the global market with the world's advanced technology.

In 2011, Sungrow successfully became the first listed enterprise in the Chinese renewable energy power supply industry, and the SUNGROW brand was also exclusively identified as one of The Most Famous Trademark in China. At present, Sungrow's complete series of products(from 1.5kW to 1.26MW) have already passed the TÜV, CE, Enel-GUIDA, ETL, CSA, AS4777, BDEW, CGC and many other trusted certificates and tests, and meet the different requirements of residential rooftop, commercial rooftop, large PV power plant on the ground and other type of projects, and support clients with integrative system solution as well.

Based on its R&D innovation and products upgrading, Sungrow keeps growing and expanding rapidly, with more and more global clients approve of, Sungrow makes its steady steps to the global leading brand in PV industry.

## 10 Reasons Why Sungrow

1. 15 years experience in PV inverters. Sungrow has 35% market share in China in 2013.
2. SUNGROW is the only inverter manufacture company listed in China stock markets as a public company.
3. 8000MW installed globally and 1000MW installed in Europe, Australia and North America.
4. Top 2 in the world based on GTM research in 2013.
5. Comprehensive after sales service system in Australia
6. Supply all marketing material to our sales partners.
7. Be proud of the best manufacturer in commercial inverters.  
PHOTON DOUBLE A FOR SUNGROW SG30KTL INVERTER.
8. Dual MPPT products with WiFi-Monitoring System
9. Strong research and development team.
10. Sungrow is the legislator of China National Standards for PV & wind grid-connected inverters.
