

## **\$50 cashback now available**

### **Battery installations**

---

For a limited time, the owner of the property or the occupier of the property (who has obtained the property owner's consent) where a battery storage system is installed, can get \$50 cashback if they register their battery with us. Even if the battery system was installed some time ago, they can still claim the cashback.

**Please contact your customers who you have installed a battery storage system for and let them know they can claim the cashback.**

So we can let your customers know about the \$50 cashback in the future, please make sure you enter your customers email address when lodging a connection application. Also, you may not be aware but it's actually a regulatory requirement to submit a connection application to us seeking permission to connect a battery system. Once we receive the connection application, we will assess it and make a connection offer.
